

The Bridge Investor Deck

This is the investor presentation deck for The Bridge - a music-led enterprise using the power of music to build connections across conflict zones.

Setup Instructions

1. Create a new repository on GitHub
2. Upload these files to your repository:
 - `index.html` - Main HTML file
 - `styles.css` - All CSS styles
 - `script.js` - JavaScript for navigation and functionality
 - `slides.html` - Contains all slide content
 - `complete-styles.css` - Full CSS from the original deck
3. Enable GitHub Pages:
 - Go to Settings → Pages
 - Select "Deploy from a branch"
 - Choose "main" branch and "/" (root)" folder
 - Save
4. Your deck will be available at: `https://[your-username].github.io/[repository-name]/`

Important Notes

1. **Copy all slide content:** You need to copy all the slide HTML from your complete deck into `slides.html`, removing only the outer `<html>`, `<head>`, and `<body>` tags.
2. **Complete CSS:** The `styles.css` file contains basic styles. You should also create a `complete-styles.css` file with ALL the CSS from your original deck for all slide types.
3. **Responsive Design:** The deck automatically scales to fit different screen sizes while maintaining the 16:9 aspect ratio.

Features

- **Keyboard Navigation:**
 - Arrow keys: Navigate slides
 - Spacebar: Next slide
 - F key: Toggle fullscreen
 - Escape: Exit fullscreen

- **Touch Support:** Swipe left/right on mobile devices
- **Fullscreen Mode:** Click the fullscreen button or press F

Customization

- Modify `styles.css` to change colors, fonts, or animations
- Update `script.js` to add new features or modify navigation
- Edit slide content in `slides.html`

Browser Support

Works best in modern browsers:

- Chrome/Edge (recommended)
- Firefox
- Safari
- Mobile browsers
